(54) **Title:** IMPROVED SYSTEM FOR ACQUIRING GEOPHYSICAL DATA

(54) **Titre:** SYSTEME PERFECTIONNE D'ACQUISITION DE DONNEES GEOPHYSIQUES

(57) Abstract

The invention concerns a module (40) for acquiring geophysical data comprising: at least a case (B''(i), B''(j)), housing processing means including means for digitizing signals; and two cable sections (C''(i), C''(j)) each comprising: at one first end, a connector (30) designed to be connected to a matching connector; at a second end, a connection piece (140a, 140b) designed to be fixed to the case and provide an electric connection with the processing means housed in the case.
